

Chrostiki was founded in 1959. Today is a leading Greek manufacturer of masterbatches, dry color blends, liquid colorants and printing inks, trading also in chemicals for the plastics and printing industries.

Our plant and offices are located near Athens Airport at a wholly owned area of 20.000sqm, out of which 6.000sqm are covered.

We export over 50% of our production to many countries in Europe, Asia and Africa. Having quality, innovation and customer satisfaction as our top priorities, we look forward to a future of continuous growth.

Passion for Quality and Innovation

Quality for us means absolute customer satisfaction. It is part of our culture and defines the way we work.

Quality is built in all our products from the design stage. Blending creativity with technology, our application specialists identify the needs of each market segment and develop integrated tailor made solutions. Experimental products are monitored in pilot plant and evaluated in state-of-the-art testing equipment for optimum performance. We set strict product specifications using standard test methods and deliver our products with inspection certificates for each lot.

Our goal is to continuously improve the speed and efficiency of our supply chain, which includes purchasing, customer ordering, manufacturing and distribution.

We operate a Quality Management System certified in accordance with ISO9001: 2015 by DQS GmbH.

Safety, Sustainability and Green Chemistry

At Chrostiki, we are committed to safe operations and environmentally sustainable products. We are fully aware of our responsibility to protect the environment and the health and safety of our employees.

We follow a green chemistry policy designing products and processes that minimize the use and generation of hazardous substances. In this respect, we stopped voluntarily the use of colorants, stabilisers and any other chemicals containing heavy metals in 2006 and we replaced all HAP solvents by safer alternatives in our products.

We follow a Reduce, Reuse, Recycle policy to minimise waste material from all major and minor operations of our company.

Our Environmental Management System is validated by TUV Austria according to the European Regulation No 1221/2009 EMAS. Chrostiki SA is registered in the Greek EMAS registry, EL-00070.

We also operate a Health and Safety Management System certified according to ISO 9001:2015 by DQS GmbH.

Excelling in Innovation & Quality

Mastertint® Color White and Black Masterbatches

For the coloration of polyolefins, PVC, styrenics and engineering plastics based on pigments and dyes

Full range of products for the packaging, houseware, agricultural, building & construction, wire and cable, electrical & industrial products.

Dryplast® & Dryflow® Powder Colorants for Plastics

Powder color blends with or without carrier for the coloration of PVC and other polymers

Filolen® Natural Mineral Masterbatches

Calcium Carbonate, Talc, and Barium Sulphate masterbatches

Masterad® Additive Masterbatches

A complete range of additive masterbatches for thermoplastics

Polytint® Liquid and Paste Colorants

Colorant dispersions in esters and polyols for the coloration of thermoplastic and thermoset polymers.
Main applications: Plasticsols, PU foam, and PU coatings, PE and PET molding

Chips

Nitrocellulose, Acrylic, Vinyl and Polyamide chips for the production of inks

Solvent Based Flexo & Gravure Inks

Ultraflex NC/PU® inks for flexo surface printing on PE, PP, Alufoil and Paper.
Neoflex PA® Inks for Flexo and Gravure Surface printing on PE, PP, Alufoil and Paper.
Neospeed PA® Inks for Flexo printing on PE Shrink Film.
Neocel NC/PU® NC/PU Inks for Flexo and Gravure printing and lamination on PE, PP, Alufoil and Paper.
Unicel NC/PU® Inks for Flexo and Gravure printing and lamination on PET, PE, OPP, CPP PA. Excellent bond strength. Suitable for retorting, sterilisation and pasteurisation applications.

Water-Based Flexo Inks

Hydroplast® Inks for surface printing on PE, PP
Hydrolux® inks for surface printing on non-absorbent paper. Fast drying. High gloss.
Hydrogloss® general purpose inks for printing on absorbent and non-absorbent paper and carton.
Hydroflex® inks for printing on corrugated board and absorbent paper.
Hydrotissue® inks for surface printing on tissue paper complying with EN646.
